MAGES HOUSE

TRADE COUNTER

- ELECTRICAL & MECHANICAL WHOLESALER
- SALES & DISTRIBUTION OF EQUIPMENT
- TOOL & PLANT HIRE / SALES
- OPEN TO THE GENERAL PUBLIC

50 years experience in offering tailor made solutions to suit every customer's need.

Mages Group was established in 1960 by Mr William Mages and has since grown to become one of the South West's leaders in electro-mechanical services. By introducing S & G Engineering to W. Mages (Rewinds) Ltd in 1999, Mages Group is now recognised for its Mechanical division, as well as having a reputation of a well established engineering firm.

MAGES GROUP

24 Hour Call Out Service & Support

Our team of highly skilled and qualified engineers are on call 24 hours a day, 365 days a year.

01934 742 308

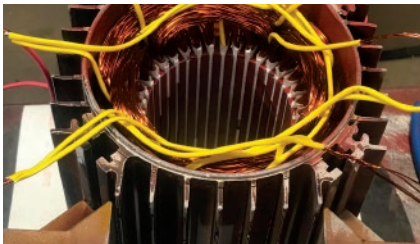

PRODUCTS:

Motors

At Mages Group, we supply, modify, and service a wide range of industrial motors to suit virtually any application. Whether you need a reliable AC or DC motor, an ATEX-approved solution for hazardous environments, or a precision servo motor for automated systems, our expert team can provide the right motor for your requirements.

As an authorised stockist of Crompton Greaves motors, we also offer trusted, industry-leading products backed by full manufacturer support. In addition, we provide motor rewinds, overhauls, and custom modifications — including shaft extensions, flange conversions, and geared assemblies — ensuring every motor we supply performs to your exact specification.

From standard motors to fully customised motorised rollers, Mages Group is your single source for efficient, reliable, and expertly supported motor solutions.

Motor Rewinds & Overhauls

Our comprehensive rewind and overhaul service restores motor performance, extends service life, and reduces downtime. From complete strip-downs and rewinds to bearing replacement, balancing, and testing, we deliver fast, reliable repairs for both standard and ATEX-rated motors.

Motor Modifications

We provide precision motor modifications to meet exact installation and operational requirements. From shaft extensions to terminal box repositioning, all work is completed to industry standards with fast turnaround and dependable results.

AC Motors

Reliable, high-efficiency motors for continuous industrial operation. Built for durability and consistent performance.

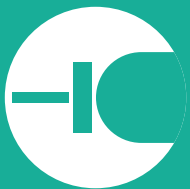

DC Motors

Smooth, precise speed control across a wide range. Ideal for variable and controlled applications.

Servo Motors

High-precision motors for advanced motion control. Designed for automation and robotics.

Motorised Rollers

Compact, integrated drives for conveyor systems. Quiet, efficient, and easy to install.

Geared Motors

Integrated motor and gearbox for higher torque. Compact, powerful, and space-saving.

PRODUCTS:

Pumps

At Mages Group, we supply, install, and service a wide range of industrial pumps for virtually any fluid-handling application. From centrifugal and submersible pumps to vacuum, diaphragm, and multistage systems, our experienced team can specify, modify, and maintain the ideal pump solution for your process requirements.

As a trusted supplier of leading brands — including the renowned Elmo Rietschle vacuum pump range — we provide proven, high-performance products backed by expert technical support. Our in-house engineering team also offers comprehensive refurbishment and overhaul services, mechanical seal replacements, and precision pump-motor alignment to ensure reliable, long-term operation.

Whether you need a single replacement unit, a complete system upgrade, or on-site pipework alterations and commissioning, Mages Group is your complete partner for efficient, durable, and expertly supported pump solutions.

Pump Refurbishment and Overhauls

Our refurbishment and overhaul service restores pump performance, extends service life, and minimises downtime. From component replacement to full rebuild and testing, every unit is returned to reliable, like-new condition.

Motor Alignment and Commissioning

Precision alignment and commissioning ensure efficient, reliable pump performance. Using advanced alignment tools, we reduce vibration, minimise wear, and deliver smooth operation from day one.

Centrifugal Pumps

Efficient, versatile pumps for a wide range of industrial liquid transfer applications. Reliable performance with low maintenance.

Submersible Pumps

Fully sealed pumps built for demanding submerged environments. Durable, dependable, and efficient.

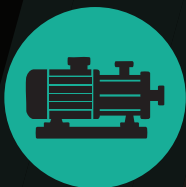

Vacuum Pumps

High-performance vacuum and pressure solutions. Engineered for efficiency and long-term reliability.

Positive Displacement Pumps

Accurate, consistent flow for viscous or abrasive fluids. Ideal for precise process control.

Multistage Pumps

Compact, high-pressure systems for water transfer and boiler feed duties. Designed for consistent performance.

Diaphragm Pumps

Robust, self-priming pumps for chemical and abrasive media. Reliable flow in demanding applications.

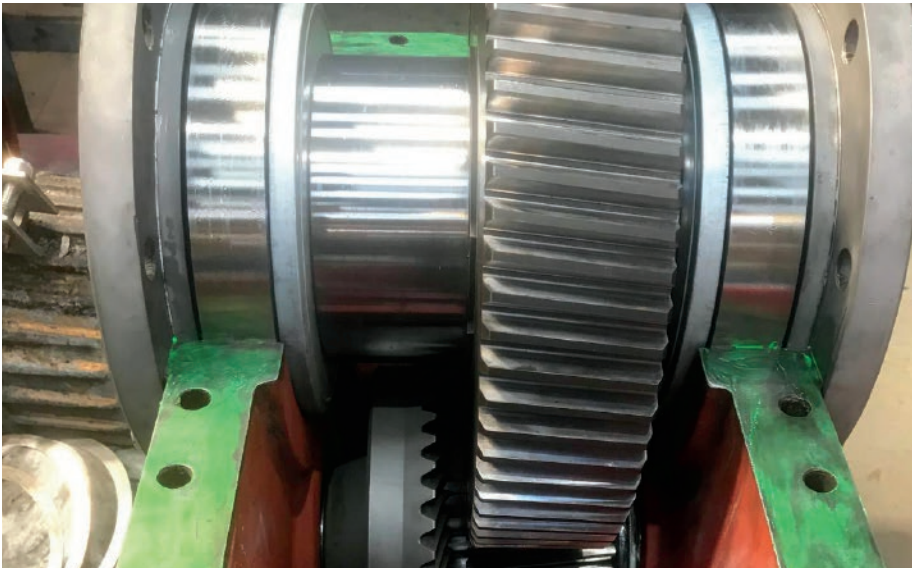

PRODUCTS:

Gearboxes

At Mages Group, we supply, service, and support a wide range of industrial gearboxes and power transmission systems engineered for reliability and long-term performance. From compact worm and inline helical units to heavy-duty bevel helical and planetary designs, our solutions deliver precise torque control and efficient power transmission in demanding environments.

As an authorised distributor and service partner for leading manufacturers, we combine proven products with strong in-house engineering expertise. We provide full lifecycle support — from selection and installation to commissioning, overhauls, rebuilds, and performance testing.

Whether you need a standard replacement, bespoke assembly, or full refurbishment, Mages Group delivers dependable gearbox solutions with minimal downtime.

PRODUCTS:

Fans

At Mages Group, we focus on proactive maintenance to keep air handling units and industrial fans operating efficiently and reliably. Regular inspection and servicing helps identify issues early — reducing the risk of costly downtime and protecting overall system performance.

Unplanned failures can disrupt production, impact output, and create avoidable costs. A structured maintenance approach isn't just good practice — it's essential for long-term operational reliability.

When to Consider Refurbishment or Repair

Over time, performance can decline due to wear, environment, and usage. Common indicators include:

- Excessive noise or vibration – potential mechanical wear or imbalance
- Reduced efficiency – lower airflow, higher energy use, or pressure loss
- Corrosion – structural degradation from environmental exposure
- Poor air quality – filter or internal contamination issues
- Temperature inconsistencies – airflow or system performance faults

We can carry out condition assessments to determine whether refurbishment or full replacement is the most effective solution.

Ongoing Maintenance After Refurbishment

Refurbishment restores performance — maintenance protects it.

- Recommended ongoing servicing includes:
- Filter inspection and replacement
- Fan, motor, and drive system checks
- Electrical and control system inspection
- Coil cleaning and airflow verification
- Structural and corrosion checks

A structured plan ensures continued efficiency, safety, and reliability.

Supply of New Fans & Equipment

Mages Group supplies and installs a full range of industrial fans and associated equipment, tailored to your application.

Centrifugal Fans

High-efficiency fans for dust extraction, cooling, and ventilation. Built for reliable industrial airflow.

Axial Fans

Compact, energy-efficient solutions for high-volume airflow. Ideal for HVAC and industrial ventilation.

Bespoke Fans

Custom-designed fans built to your exact specifications. Optimised for performance and space requirements.

Extraction & Ventilation

High-capacity units for removing fumes, dust, and heat. Designed to maintain safe working environments.

Air Handling Units

Inspection and component replacement to restore full efficiency. Extends equipment life and performance.

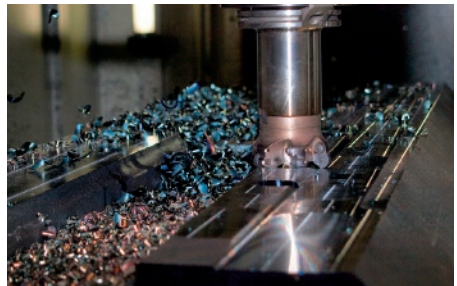

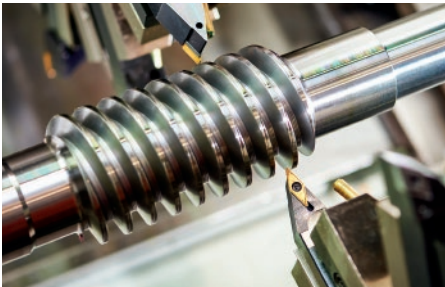

Balancing/Vibration Analysis

Dynamic balancing and diagnostics to reduce vibration and noise. Ensures smooth, reliable operation.

ENGINEERING: Machining

At Mages Group, we provide a full range of precision and heavy machining services to support the manufacture, repair, and modification of industrial components. Our well-equipped workshop features advanced CNC machinery, large-capacity lathes, and multi-axis milling equipment capable of handling both intricate parts and heavy-duty assemblies, with turning capacity up to 6 metres in length and 1 metre in diameter. From small, high-precision components to large shafts and housings, we have the capability to deliver accurate, dependable results.

Our engineers bring decades of hands-on experience, combining traditional craftsmanship with modern tooling and inspection methods to ensure quality, consistency, and reliability. Whether producing bespoke components, refurbishing worn parts, or responding to urgent breakdown repairs, we deliver practical machining solutions focused on precision, efficiency, and long-term performance.

Service & Support**

01934 742 308

Turning

Large-capacity turning for shafts, rollers, and heavy components. Accurate machining with smooth, reliable finishes. Up to 6m length / 1m diameter.

CNC Turning & Milling

Advanced CNC machining for complex parts and tight tolerances. Consistent, repeatable production quality.

Water Jet Cutting

Cold-cutting for metals, composites, and plastics. Clean edges without heat distortion.

Horizontal & Vertical Boring

High-accuracy boring and facing for large components, bases, and housings. Ensuring precise tolerances and correct alignment.

Slotting & Keyway Cutting

Precision internal and external slotting and keyways. Restoring or creating accurate drive interfaces.

Metal Spraying & Shaft Repair

Thermal coating and shaft rebuilds to restore worn surfaces. Extending component life and performance.

Precision & Heavy Engineering

Machining and fabrication of complex or large-scale components. Built for strength, accuracy, and demanding applications.

ENGINEERING: Fabrication

At Mages Group, we deliver a full range of fabrication services, from light sheet metal work to complex structural steel assemblies. Working with mild steel, stainless steel, and aluminium, our skilled fabricators produce precision-built components and structures to exact specifications, supported by strong in-house capability and experienced mobile site teams.

From bespoke fabrications and safety structures to full on-site installations and repairs, we manage projects of all sizes with a practical, hands-on approach. Every job is completed with a focus on strength, accuracy, and finish — providing durable, reliable fabrication solutions built for long-term performance and safety.

MIG, TIG & ARC Welding

Professional welding services across a wide range of materials and thicknesses. Delivering strong, clean, and reliable joints for structural and precision fabrication work.

Mild Steel, Stainless & Aluminium

Precision fabrication in all major metals, tailored to your exact requirements. Designed for durability, corrosion resistance, and a high-quality finish.

On-Site Fabrication & Repairs

Mobile fabrication and repair services for installations, modifications, and emergency breakdowns. Helping minimise downtime while maintaining safe and efficient operations.

Safety Railings, Platforms & Ladders

Custom-designed access systems built to meet current safety regulations. Providing robust, long-lasting protection in demanding industrial environments.

Bespoke Structural Steelwork

Complete design and fabrication of frames, supports, and one-off structures. Combining engineered strength, precision, and reliability for heavy-duty applications.

ENGINEERING: Custom Builds

At Mages Group, we design and deliver custom-engineered solutions built around your specific industrial requirements. Our multidisciplinary team brings together mechanical, electrical, and fabrication expertise to develop complete systems — from standalone machinery to fully integrated production assemblies — managing every stage from concept and design through to installation and commissioning.

With in-house machining, fabrication, and electrical capability, we maintain full control over quality, timelines, and performance. Whether upgrading existing equipment, building bespoke plant machinery, or producing turnkey pump and fan skids, every custom build is manufactured to exact specification, fully tested, and ready for safe, reliable long-term operation.

**24 Hour Call Out
Service & Support**

01934 742 308

Machine Overhauls & Upgrades

Comprehensive mechanical and electrical overhauls to restore performance and improve efficiency. Extending the operational life of existing equipment while reducing the risk of breakdowns.

Conveyors

Design, manufacture, and servicing of conveyor systems, including roller, belt, and chain setups. Built for smooth, reliable material handling across industrial environments.

Mechanical & Electrical

Custom-engineered solutions combining precision fabrication with tailored electrical control systems. Designed to meet specific process and operational requirements.

Fan and Pump Skid Assemblies

Fully engineered, pre-assembled skid systems integrating pumps, fans, pipework, and controls. Enabling faster installation and minimal on-site disruption.

Confined Space Support

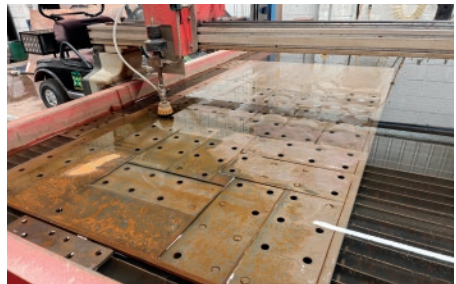

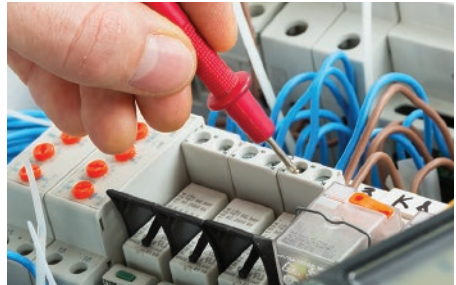

Specialist engineering and maintenance services carried out safely in confined or restricted environments. Delivered by qualified personnel with full compliance and certification.

SUPPORT: Services

At Mages Group, we design, supply, and service a complete range of industrial fans and air movement systems to suit virtually any application. From high-performance centrifugal and axial fans to fully bespoke, in-house-manufactured units, our solutions are built for efficiency, reliability, and durability in demanding industrial environments.

Working with trusted brands and backed by our own in-house fabrication and engineering capabilities, we provide tailored systems designed to meet exact airflow, pressure, and noise-level requirements. Our experienced team also offers full fan refurbishment, air handling unit rebuilds, on-site balancing, and vibration analysis — ensuring every fan performs at peak efficiency throughout its operational life.

Whether for process ventilation, dust and fume extraction, or general air handling, Mages Group delivers engineered fan solutions that combine precision design, expert installation, and dependable long-term performance.

Electrical

Our NICEIC-accredited electrical division delivers comprehensive industrial and commercial services, including inspections, testing, installations, inverter integration, and full certification to 18th Edition standards. With planned maintenance, project support, and a 24/7 call-out service, we ensure safe, compliant, and reliable operation across your site.

Site Services

Our site services team provides 24/7 breakdown support, shutdown assistance, and confined-space certified engineering to keep your operations running with minimal disruption. From electro-mechanical projects and inverter installations to stainless welding, inspections, and air handling support, we deliver safe, compliant, and fully integrated on-site solutions.

Parts & Sales

We supply a comprehensive range of industrial parts and equipment, including motors, pumps, gearboxes, inverters, hydraulic hoses, power transmission products, rollers, fans, tools, and engineering consumables. With quality brands, fast availability, and expert support, we keep your operations running efficiently and with minimal downtime.

Additional Services

We provide a broad range of specialist support services, including hydraulic ram repairs, dynamic balancing, laser alignment, thermal imaging, ultrasonic thickness testing, and air handling refurbishment. With facilities support and generator hire available, we help improve reliability, extend asset life, and minimise operational downtime.

BUILDING: Construction

At Mages Group, we carry out a wide range of building and construction works across industrial, commercial, and private sites. From roof repairs and general maintenance to full refurbishments, fencing, gates, and structural improvements, we focus on practical, well-built solutions that protect and improve your facilities for the long term.

Our team handles everything from small repair jobs to larger upgrade projects, keeping work organised, compliant, and on schedule. Alongside this, we deliver complete groundworks and infrastructure services — including road and car park repairs, drainage, underground pipe replacement, foundations, and concrete bases — all completed safely, efficiently, and with minimal disruption to your day-to-day operations.

**24 Hour Call Out
Service & Support**

01934 742 308

Roof Repairs & Maintenance

From leak repairs and damaged tiles to full roof refurbishments, we keep buildings weatherproof and protected. Reliable maintenance that helps prevent costly long-term damage.

Private Road/Car Park Repairs

From pothole patching to full resurfacing and line marking, we restore safe, durable access routes. All work is completed efficiently with minimal disruption.

Fence & Gate Installations

We design, fabricate, and install secure fencing and gates for controlled access. Robust, cost-effective solutions for industrial, commercial, and private sites.

Underground Pipe Replacement

Replacement and repair of water mains, drainage, and service ducts. Durable, compliant installations with minimal site disruption.

Building Refurbishments

Internal alterations, upgrades, and full refurbishments carried out to a high standard. Practical improvements that restore and modernise your facilities.

Groundworks

Complete groundworks including foundations, drainage, trenching, and concrete bases. Safe, efficient delivery for projects of all sizes.

Drainage

New drainage systems, repairs, and unblocking services. Keeping sites protected from flooding and operational disruption.

Distribution Partners

At Mages Group, we work in partnership with some of the most respected manufacturers in the industrial engineering sector. These strategic relationships allow us to supply high-quality motors, gearboxes, pumps, drives, automation components, power transmission products, tools, and engineering consumables — all backed by proven global brands.

As authorised distributors, stockists, and repair agents, we combine leading product ranges with strong local stockholding and in-house engineering expertise. From Crompton Greaves motors and Brown gearboxes to SEW-EURODRIVE drive systems, Renold transmission products, Schneider Electric automation, and specialist pump manufacturers including EBARA, DAB, and EFAFLU, we ensure rapid availability and dependable technical support.

Our partnerships mean more than supply. They allow us to provide expert product selection, modifications, certified repairs, system integration, and aftersales support — giving customers confidence that every component is specified correctly, delivered quickly, and supported properly.

Whether you require a single replacement unit, a complete drive system, fluid handling solution, automation upgrade, or ongoing MRO supply, Mages Group delivers trusted brands with the service, responsiveness, and engineering knowledge to keep your operations moving.

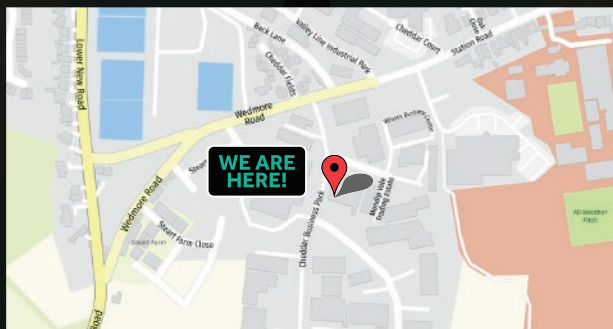

Accreditations

Quality, safety, and compliance are central to how we operate at Mages Group. Our accreditations and industry memberships reflect our commitment to maintaining the highest standards across engineering, electrical, and construction services — ensuring every project is delivered safely, professionally, and in full compliance with current regulations.
